Imagine no poverty
I wonder if you can
All decisions based on felt needs
A federal brotherhood of man
Imagine all the Indians
pulling together to reform...

Imagine there's no middleman
It isn't hard to do
Only cloud, mobiles and Aadhaar
And no patwari and banks too
Imagine all the Indians
using only e-cash...

Imagine there's no poison
in the food you eat
No arsenic in the water
Above us clean air to breathe
Imagine all the Indians
living with mother earth as one...

You may say I'm a dreamer
But am I the only one
I hope today you'll join us
and India will lead the way...

In a world torn by economic stress, India stands as an island of relative calm. If its economy isn't topping the charts, it isn't doing badly either. However, if we have to stay this way and do even better then we need to get cracking without delay.

At its very foundation the economy needs meaningful reform and real change in the living standards of the people below the poverty line. Growth will become more sustainable if the states become smarter, both, in their economic performance and governance standards. That way the ideal inside out flowering of a Nation will become reality.

Then we shall have thriving city-states, functioning as commercial and business hubs that will take the burden away from the handful of already choking metropolitan centres. This will also engender a new wave of greening in India, where the commitment to the environment will transmute from mere slogans to actionable ecology.

All this requires readiness at the bottom, commitment from the top and honest work all around. The time is right for a new kind of leadership, a leadership that is truly osmotic and sustainable in the long term- economic development that promotes laissez faire with a socialistic charter in its heart.

Presents

22nd SEPTEMBER 2015
STEIN AUDITORIUM
INDIA HABITAT CENTRE, NEW DELHI

CURTAIN RAISER

08:30-09:00	Registration & Tea
09:00-09:15	Inauguration and Exhibition Opening

	Closing Remarks: Mr Siraj Hussain, Secretary, Department of Agriculture and Co-operation

DISCUSSION FRAMEWORK

While the packaged food industry has been under scanner, the safety of foods like vegetables, grains and pulses that are consumed by all of 1.2 billion people remains neglected. Problems caused by the Green Revolution are coming home to roost. Poor quality and quantity of ground water, food full of chemicals and pesticides and the resultant cancer clusters are visible in some states already. Organic and traditional farming is the way to go.

Discussion framework is as follows:

1. Grow your own food, terrace and balcony farming in Urban Areas and Smart Cities - Advanced, yet organic technologies of aquaponics, organic hydroponics besides the regular terrace farms based on compost of household waste etc.
2. Consume Where You Grow - Procurement support instead of inputs subsidies
3. De-centralised and local processing units - Value-added products, related rural industries and employment
4. Linking of consumer cooperatives with the producers of certified safe food products
5. Linking producers to markets
6. Are standards for organic and traditional foods required?
7. Availability of skilled manpower for evergreen revolution

13:00-14:00	Lunch Break
-------------	-------------

22ND SEPTEMBER 2015, SILVER OAK II, INDIA HABITAT CENTRE, NEW DELHI

14:00-14:10	Chair and Introductory Remarks: Dr M Ramachandran, Distinguished Fellow, Skoch Development Foundation & Former Secretary, Urban Development, Government of India

	Mr Amol Pandey, Senior Director, Corporate Finance, YES BANK
	Mr Rahul Savdekar, Director-Industry Solutions (Government), Microsoft Corporation (India)
	Mr Prakash Rane, Managing Director, ABM Knowledgeware
	Mr Vikas Gupta, Municipal Commissioner, Gurgaon
	Mr Suparno Banerjee, VP & Global Head, Public Sector Programmes, HP
15:10-16:30	Roundtable Discussion of all Participants and the Panelists
16:30 - 17:00	Tea Break and Exhibition
17:00-18:00	Skoch Order-of-Merit Awards

DISCUSSION FRAMEWORK

Smart cities have to be designed as empowered cities where the felt-needs of its citizens are brought to bear to make a participatory plan and the local city government is empowered to take all decisions, has the capacity to execute and be accountable for the delivery. Call it a CEO Model or a Union Territory Model—essentially India needs City States to handle the pressure of growing urbanisation. Basic services like waste and water management, roads, power etc need to be addressed first. Cities have also to be made resilient. Our Administrative Services model, which is more rural facing, needs to be revamped to cover modern management and city governance practices.

Discussion framework is as follows:

1. Citizen participation
2. Local public sector enterprises, not centre and state foisted agencies
3. Bi-directional dialogue between the administrators and the citizens
4. Fiscal and administrative independence
5. City needs to be resilient. It should have the capacity to face effectively natural calamities and other challenges
6. Role of Public Cloud as Enabler of Smart Cities

MUNICIPAL COMMISSIONERS

Mr Ananta Narayan Jena, Mayor, Bhubaneswar Municipal Corporation
Ms Bhavna Garg, Commissioner, Municipal Corporation Chandigarh
Mr H S Patel, Municipal Commissioner, Vadodara Municipal Corporation
Mr Harshad Patel, Municipal Commissioner, Jamnagar Municipal Corporation
Mr K Vijaya Karthikeyan, Commissioner, Coimbatore City Municipal Corporation
Mr Lavkush Singhrol, Commissioner, Municipal Corporation Ambikapur, Surguja
Mr Ramyakumar Bhatt, Assistant Commissioner, Ahmedabad Municipal Corporation
Mr Sanjay Kumar, Additional Commissioner, Bhopal Municipal Corporation
Mr Sanjay More, Mayor, Thane Municipal Corporation
Mr Sanjay Srivatsav, Chairman, Raipur Development Authority
Mr S Hari Krishna, Assistant Engineer, Kurnool Municipal Corporation
Mr Sanjeev Jaiswal, Commissioner, Thane Municipal Corporation
Mr Suresh Jagtap, Joint Commissioner, Pune Municipal Corporation
Mr Sushil Khodawekar, Commissioner, Nanded Waghala City Municipal Corporation
Mr Uma Shankar Gupta, Commissioner- Local Government Punjab, Municipal Corporation Sahibzada Ajit Singh Nagar (Punjab)
Mrs Vijayalakshmi M, Commissioner, Tiruchirappalli City Municipal Corporation

TRANSPORT / TOURISM

Ms Sumita Misra, Principal Secretary – Tourism, Government of Haryana
Mr K Ravinder Naik, Transport Commissioner & Managing Director, U.P. State Road Transport Corporation (UPSRTC)
Mr Rajender Kataria, Managing Director, Karnataka State Transport Corporation

	Chair: Dr Gulshan Rai, National Cyber Security Coordinator, PMO
17:00-18:00	Skoch Order-of-Merit Awards

DISCUSSION FRAMEWORK

With the impending digitalisation and consequent connecting of India, we have a great opportunity to dis-intermediate financial and government services to the common citizen. Digital India is one of the most ambitious programs being undertaken to link every Indian to the information and services that they need and catalyse a knowledge based economy at all levels, be it areas of agriculture, health, financial services or any citizen or business activity and economic value add. We have already seen several ambitious plans being rolled across the domain ministries as well as at DeitY. The speed of deployment would be critical and an open market play for the infrastructure and service providers is crucial for the government to be able to meet its governance objectives.

Discussion framework is as follows:

1. Encouraging and involving private players in infrastructure and service provisioning
2. Guidelines for Public Cloud and data classification
3. What kind of services can be delivered using the public cloud?
4. Data Sovereignty and security
5. Procurement of a public cloud and services
6. Accreditation of service providers
7. Differentiation

PARTICIPANTS - CENTRE

Mr A U Sonawane, Head - Radiological Safety Division, Atomic Energy Regulatory Board

Dr Shefali Dash, Deputy Director General, National Informatics Centre

Mr Srinivasa Raghavan, Scientist -F, National Informatics Centre (NIC)

Ministry of Home Affairs

	Mr Ravindra Singh, Former Secretary to Government of India
15:05-16:30	Roundtable Discussion of all Participants and the Panelists
16:30-17:00	Tea Break and Exhibition
17:00-18:00	Skoch Order-of-Merit Awards

DISCUSSION FRAMEWORK

The era of reforms has been ushered in, and there is a whole gamut of challenges and bottlenecks that need to be overcome if we are to compete on a global scale. For any nation to be seen as harboring development goals and securing prosperity for its citizens, the governance would need to be put in a high gear. This involves usage of state of the art technologies, government process reengineering and passionate officers capable of thinking out of the box and bringing about a change. There is lot to be learnt from the private sector on effective use of technologies like public cloud, mobility and e-commerce.

The discussion framework is as follows:

1. Integral part of process and legislative changes to any reform agenda
2. Ability to evaluate, differentiate and procure services versus a contractor and procurement approach
3. Identification of key domain challenges and how re-architecting can help solve these
4. How to make the entire governance process more participative and create action agendas based on felt needs

PARTICIPANTS

Mr Aiban Swer, Director, Department of Planning, Government of Meghalaya
Mr Ajit Kesari, Principal Secretary , Department of Cooperation, Government of Madhya Pradesh
Ms Akansha Kumari, Deputy Manager (Energy), Energy Management Cell, GSFC, Vadodra

16:30-17:00	Tea Break and Exhibition
17:00-18:00	Skoch Order-of-Merit Awards

DISCUSSION FRAMEWORK

Young India has tremendous potential—for itself and for the world, both as a marketplace and a development hub. However, many policy initiatives have not seen the light of day and this has resulted from inaction, poor planning and corruption at many levels in the last 10-15 years. We have seen land reforms getting stalled, GST Bill stumbling from one parliament session to another, labour reforms being held hostage to vested interests and unrealistic and unreasonable visualisation of global realities, and many more well-intended reforms that got strangled before they could fructify. This has delayed our coming of age and also made poverty cruelly endemic to our country. On the other hand, internationally, India's image as an investment destination has taken a hammering.

Once GST gets implemented, certain issues on inter-state standings are bound to arise. The industry is wondering if the new GST regime will, in fact, raise taxes, especially in wake of the 1 per cent additional levy to states as promised by the centre. Also, if some states agree and others don't, would the GST regime be termed successful?

The discussion framework is as follows:

1. How to streamline pensions despite its voluntary nature and multiplicity, which has kept the penetration low?
2. Mismatch of fiscal bearance and actual expenditure.
3. Concerns emerging from GST regime, both in terms of delay as well as its success factors.
4. Low concern for inflation on pensioners.
5. Linking of pensions with capital markets.
6. Creating a common delivery platform for pensions and social security on a public cloud.

PARTICIPANTS

Mr Ajeet Kumar, Mission Director - Samagra Mission, Department of Social Justice & Disabled Welfare, Government of Madhya Pradesh
Mr Alok Kumar Pandey, Collector & District Magistrate - Revenue Department, Collector Office, Junagadh

16:30 - 17:00	Tea Break and Exhibition
17:00-18:00	Skoch Order-of-Merit Awards

DISCUSSION FRAMEWORK

Pillar 8 of Digital India proposes to train in the next 5 years one crore students from smaller towns and villages for IT sector jobs, and 500,000 rural youth in telecom services, followed with training of 300,000 agents for delivery of IT services in two years. By 2019 Indians will be digitally empowered through universal access to digital infrastructure as well as various government services through mobile and other modern devices, enabling full participation in the knowledge economy. Digital literacy gives individuals the skills they need to make use of new education options like MOOCs; Mobile Distance Learning, Micro Learning, Online Learning Communities, Gamification, Data Analytics and so on. E-healthcare forms part of the Digital India Initiative but able execution in the healthcare sector will require enabling infrastructure to maximize the benefits. There are governance issues across these sectors.

The discussion framework is as follows:

1. There is no well-defined governance framework for any of these three sectors – health, education and skill development. How the governance and administrative structure be changed to achieve far more efficiency in all these areas?
2. Some of the most robust and scalable online learning delivery, content management and portal systems are - Moodle, Canvas, Chamilo, the Edx platform. How do we leverage these technology based platforms and learning management systems?
3. How can universal access to education and health be achieved?

PARTICIPANTS

Dr Abhay Wagh, Director, Maharashtra State Board of Technical Education, Mumbai, Maharashtra
Mr Akhilesh Mittal, Joint Director IT, Rajasthan Public Service Commission
Mr Anil Parashar, Centre Head, Society for Promotion of IT in Chandigarh (SPIC)
